

## PVC + Foamed PVC + PVC three layered pipe making Project.

**Underground pipes need much pressure bearing capacity, must need to absorb impacts also with no deformation due to middle layered is foamed.**

Plant with Belling machine and can make 80 to 160 mm Diameter and 200 to 250 Diameter pipes, three layered.	1.58 Cr
---	---------

Can and should replace all normal pipes too who get fast eroded with the heat as also can be made thicker body with middle foaming.

**Obviously, it is 100% re-cyclable and does not offer any threat to environment too. Can save cost on long life and no leakage issues.**

**Depending upon the diameter and wall thickness and also the different formula, the production can stay at 0.4 to 4.6 MPM.**

---

### We offer Total Assistance to:

Set up the project right from first step      Manpower placement      Start Up      Formula      and much more  
Raw material sourcing.      Quality Machinery and Equipment sourcing AND Aftersales Guarantee / Warranty

We are highly technical & professional Consultants, assisting to set up new projects.
