

GYP SUM board Making Line layout:

All Approximate for 10-million-meter square capacity plant 300 days x 24 hours working

Building Sq. M.	Sq Feet	Cost
11650	125703.5	125703500
Land 9 Acres	392040	36000000
Machinery		170000000
Utilities		37500000
Shipment, installation and other misc. start-up costs, electrifications, deposit.... et-cetera.		25000000
Consultant's cost		2500000
Project report		1000000
Total Initial cost		397703500

We are highly technical & professional Consultants, assisting to set up new projects.

PU Sandwich Board production line:

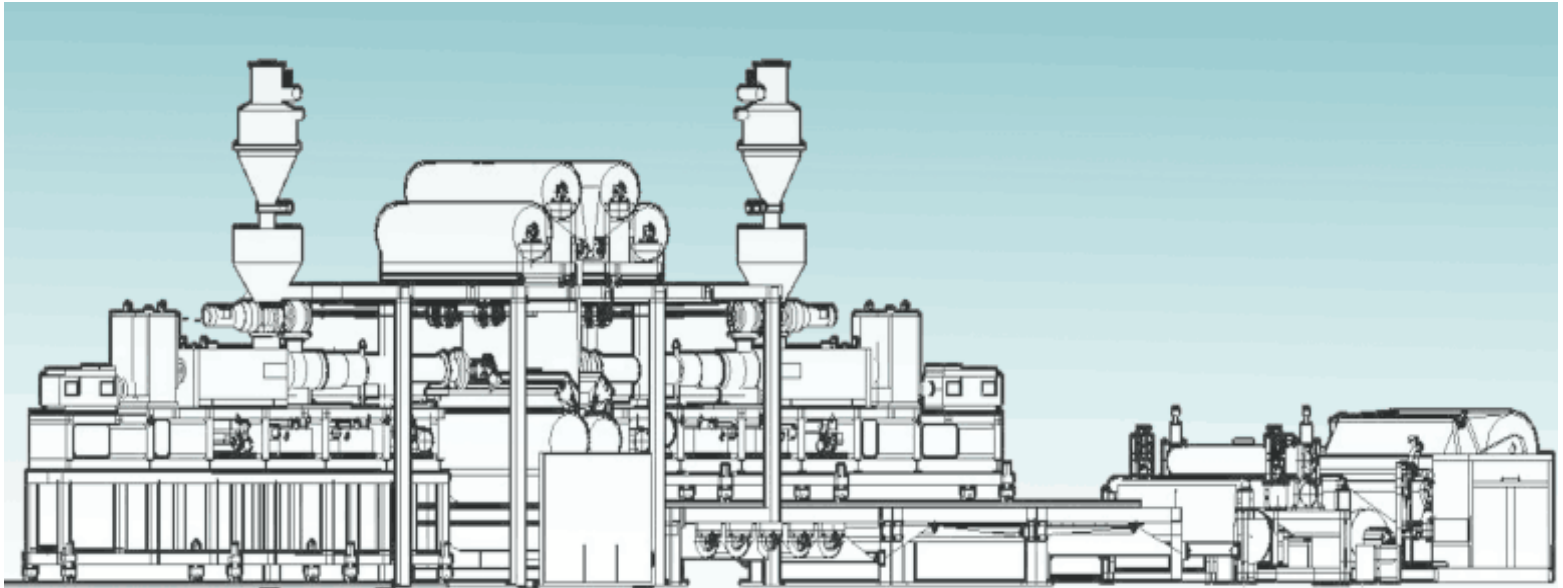

Project cost for 9M Lac Sq. M per year of 312 days	
Land	15000000
Building	33250000
Machinery	135000000
Utilities and all initial costs	9850000
Total costs Rs.	193100000

We are highly technical & professional Consultants, assisting to set up new projects.

Flex Banner making line:

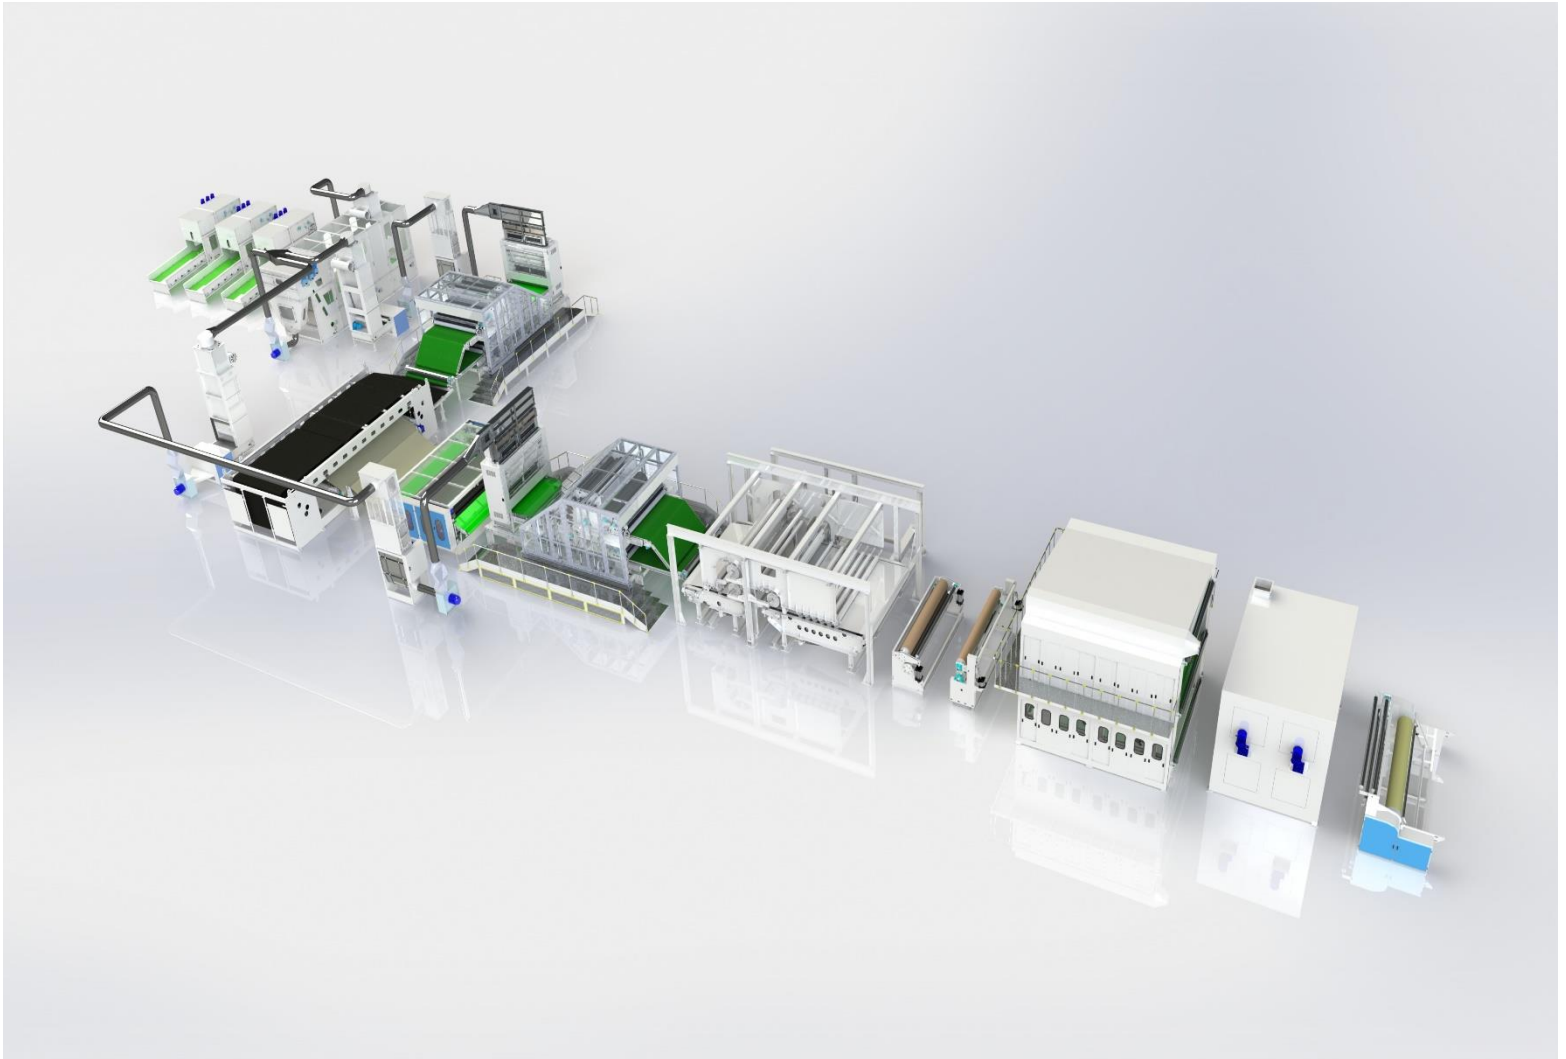

Machine cost landed in INDIA	12000000
Land cost assumed: ESTIMATED- Assumed, apportioned for the calculation purpose.	1000000
Cost of Building 20000 Sq. Feet Building at Rs. 500 Per Sq. Feet.	2000000
Panel ESTIMATED	500000
Cables and all other Purchases for electrification: Estimated, Power needed can be 800 KW= 1067 HP, 3 Phase 380V 50Hz	500000
Transformer, if needed.	2500000
Installation cost: Almost.	750000
Electricity Board cost: ESTIMATED [power needed 1067 HP, connected load]	10000000
Consultant's cost	2000000
Three visits to china cost for the order, and during the production of machinery [Cost of consultant on CHINA Visits]	500000
Cost on Customer's Visit of CHINA to meet the machinery company and to finalize the plant.	100000
Total Initial Project Cost: RS.	166850000

Advertising, message dispalys at Banks, all over for hundreds of items, elections, movies..... Unlimited applications.

SPUN LACE non-Woven fabric making line

With the machinery cost of about Rs 22.5 Cr with installation, the initial investment in the project can start at about 30 Cr.

This is the fabric which is needed to make all types of WET wipes. No plant in INDIA making this.

Wet wipes' market in INDIA is 75 Cr for children's applications and 25 Cr for face wet wipes.

In all today the market size is 100 Cr, worth of fabric which is imported.

We are highly technical & professional Consultants, assisting to set up new projects.

The Marble look alike board are as above.

And PVC laminate which replaces MICA, look like below.

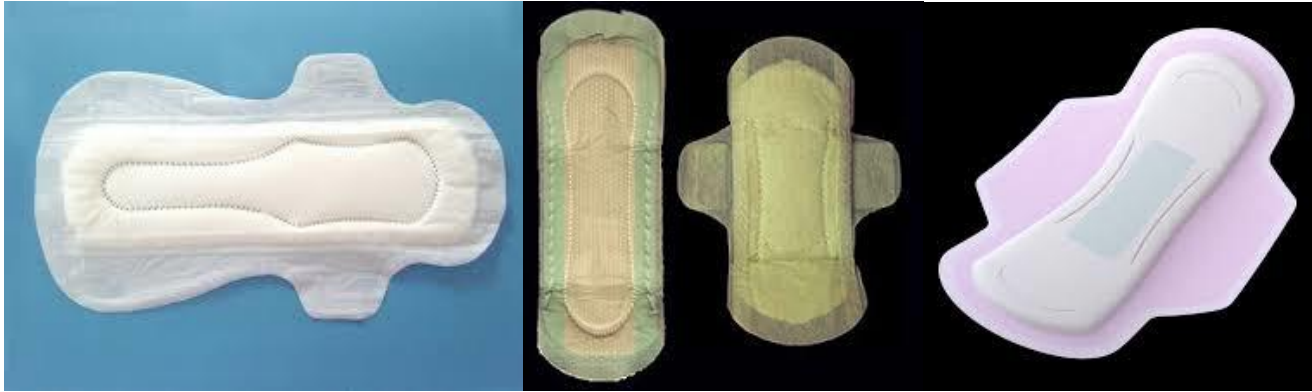

Investment in one project makes three items.

- 1) SPC Flooring which replaces Wooden / Vinyl / laminate flooring.
- 2) 2 to 8 mm thick Marble / Granite look-alike board which replaces Marble and Granite for walls.
- 3) 1 mm thick PVC laminate which replaces all types of MICA.

We are highly technical & professional Consultants, assisting to set up new projects.

Sanitary Napkin Making.

This is the best possible business now as the usage is at 50% among the ladies in INDIA as against 10% five years back. GOI made compulsory during 2015, for the state governments to distribute among females aged 10 to 19 and we have mere 22 plants in INDIA as against need of **hundreds of** plants to meet local demand as per estimate and population calculations

Investment in the project can be at 7 to 8 Cr; overall, the profitability can stay at about 5 Cr on minimum.
This is the business to make money FASTEST possible.

Have a look at the data:

Calculations on Machinery						
No of machine	Pcs per minute	Per hour	per day	Per month	Per year	No of machines needed
1	500	30000	600000	15600000	187200000	338.1084677
1	1000	60000	1200000	31200000	374400000	169.0542338

The product needed with and without brands and the opportunities are unlimited. The market is ever expanding and has no substitute or replacement so far even in the most developed countries. And so is worth looking at.

We are highly technical & professional Consultants, assisting to set up new projects.

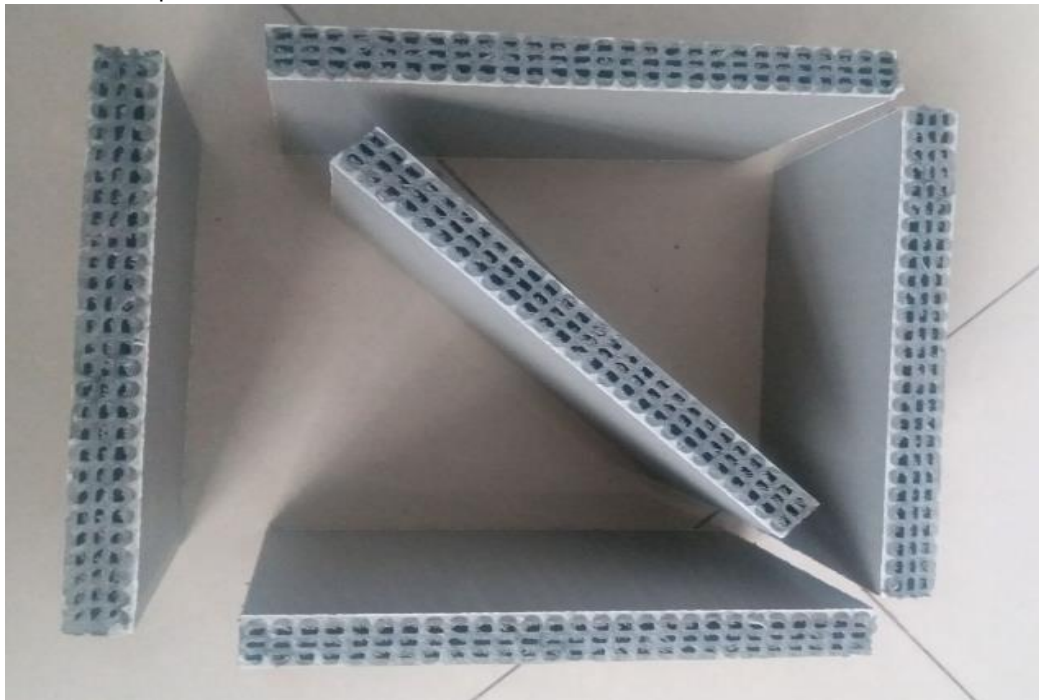

Hollow Construction board to replace Shuttering boards and metals.

- Shuttering ply are costlier, can be used for 8 to 10 times.
- They are wood, are getting scarce.
- They swell, need oil to be used each time of application.
- Metal boards are heavier, get rusted, do not offer smooth finished surface.

As against which plastic construction boards:

- Do not need oil
- Can be used for 80 to 100 times
- Are 100% re-cyclable
- Can be made from virgin and re-cycled plastic
- CaCO₃ is added to make them cheaper and stronger.

So: prove much cheaper.

GO for this. The investment in the project is about 4 Cr. ONLY. This is the one new project that can attract many and shall change the way construction is undertaken.

NEW project and no crowd making this, hardly any in fact.

We are highly technical & professional Consultants, assisting to set up new projects.

Wood + Plastic Hollow doors and SOLID frames:

- Made from WOOD + Plastic + CaCO₃
- Much stronger
- Needing no color nor varnish, yet can do as needed.
- Can be made in colors directly from machine as needed.
- Entire of CHINA / Europe / USA got switched to this.
- Construction sector is to be booming for 'House for all' policy.
- Huge replacement market
- High quality, High cost housing demand is on Rise.
- Termite and water proof, almost maintenance-free
- Limited wood content, that too wood powder which is a by-product when wood is worked upon.
- Fastest and ready availability-plug and play kind of doors.
- Good looks and highly strong

The initial Investment in the project can stay as below:

	Indian Rupees
Machinery cost	4,25,00,000
Land	1,00,00,000
Building cost	1,25,00,000
Utilities	50,00,000
Installation and consultation charges	20,00,000
Total	72000000

New Business

Few in INDIA to make

Huge New and Replacement Market. And ever-expanding Bigger Housing projects.

Huge profitability.

We are highly technical & professional Consultants, assisting to set up new projects.
