

TPU (Thermoplastic polyurethane) is in fact a Supercritical foaming material used in for **many applications** as below:

- Automotive interiors
- Insulation gaskets for new energy batteries & also acts as insulation cushioning
- It is applied to 5G antenna covers
- Widely used in shoe materials

Material Characteristics:

- No odor
- as light as just 40 Kg per meter cube weight
- High strength
- Non crosslinked,
- 100% recyclable
- Excellent thermal insulation,
- shock absorption,
- waterproof
- sound insulation performance

Please note important data on the project:

| | |
|---------------------------------|----------|
| Project cost | 5.29 Cr. |
| Machinery cost | 2.52 Cr. |
| Profitability / Year ON minimum | 11.37 Cr |
| Profitability / Year ON maximum | 16.89 Cr |

This is high profit margin business and not much of crowd exist to make this.
